

## **PARAMOSE®**

**How to use:** page 1

### PARAMOSE WATER WASHABLE

- Cover top with a cloth during opening to avoid splashes.
- Apply generous, even coat with a suitable brush (never spread too thin).
- Leave until surface coating reacts (approximately 5-30 minutes) depending on type of coating.
- Once surface has blistered apply a second generous coat onto the blistered paint or varnish and leave to penetrate down to the substrate.
- Scrape off leaving surface as clean as possible following wood grain at all times.
- Apply a third coat onto any stubborn areas and leave for 5 minutes.
- Wash down with stainless steel scourer and soapy cold water, following wood grain at all times.

### To be used on

- Any wood or architectural furniture.
- Metal.
- Glass.
- Ceramics.

### Who uses Paramose

- Antique restoration and refurbishment companies.
- Paint lacquer distributors.
- DIY.
- Paint merchants.
- Industrial applications.

### Preparation

- Ensure surfaces to be stripped are dry.
- Protection should be provided for floor coatings, or any surface that may be damaged by Paramose (perspex, plastics, rubber etc).
